Introduction

Teka
Kitchen Division

In Kitchens, Teka numbers among the leading sink and built-in appliance brand, manufacturing quality home appliances, commercial equipment and most importantly - Kitchen sinks.

It is one of the world’s largest producers of sinks and the only technology manufacturer in today’s market offering a fully integrated range.

Teka is a world-wide brand with sales offices and production facilities in every corner of the world in over 125 countries in 5 continents. In addition to its own facilities various agents across the world have chosen Teka as their company partner.

Splash Zone
Official Supplier

Teka was selected as a result of several leading kitchen manufacturers requesting a bigger and better range of sinks than what was currently available on the South African market. However, with their superb design and reliable quality, Teka soon became the first choice for more and more home owners throughout South Africa.

Currently Splash Zone, with Teka offers the most extensive range of inset and undermount sinks available on the South African market. The underlining success of the Teka/Splash Zone relationship is based on the thinking that the consumer should select the features they would like to have on a kitchen sink and not the manufacturer. After all, it should not be an unreasonable request to want a sink with deeper bowls.

Inset Sinks

Teka inset sinks are impressive in every aspect. Inset sinks are far from the norm, each sink range has its own unique styling on both the bowls and drainer board.

Inset sinks bowls are generally larger and deeper than their competitors, and all feature 18/10 stainless steel with thickness ranging from 0.66mm - 1.2mm. From entry level to exclusive, Teka is sure to have an inset sink to suit your personal taste and budget.

Mixers

A limited range of Teka mixers are stocked as part of our South African offering.

These mixers are both beautiful in design and excellent in quality. Each mixer contains a ceramic cartridge which allows smooth operation for years to come.

Undermount Sinks

Teka undermounts are by far the most popular sinks in the South African market. We boast the largest range of undermounts in the southern hemisphere and do so because we believe every individual is unique.

Undermounts are manufactured by the highest quality standards with stainless steel thickness of 1.2mm.

Microtextured Sinks

Microtextured sinks are manufactured from stainless steel, the textured finish hides scratches while maintaining a stainless steel look and resistance.

Microtexture offers an attractive high relief pattern on the sink’s surface. This exclusive finish is also made from ‘surgical’ stainless steel, i.e. with all the characteristics of stainless. The stainless steel hard-plus finishing gets better result indeed than the standard stainless steel thanks to the special treatment applied to the surface that improves the hardness and the resistance against scratches, making it an ever lasting perfect piece of design in the kitchen.

Waste Disposers

Homes that employ the use of waste disposers are entering into the new age of cleaner and greener living.

Food waste is quickly and easily disposed off, eliminating potential pest and smells from sharing your kitchen.

Contract Sinks

Teka sinks cover every price point without compromising quality.

Specifically manufactured for high quantity development schemes, contractors sinks are manufactured with the same high quality as the rest of the Teka product range.

Teka, almost 90 years of creative genius

Innovation and a strict commitment to the highest quality standards are two ideals that make Teka the first choice for more and more homes.

Since1924, Teka group has dedicated all its resources and expertise to achieve one single goal: improving the quality of life of millions of customers.

From an innovative design to improved features, every production process undergoes constant improvement. All this while paying special attention to each detail. Because at Teka, even the smallest detail counts.

When you consider just how much time you spend at the kitchen you realise how important it is to have a kitchen that combines design with user-friendliness.

When purchasing a kitchen sinks it is extremely important to consider each sink’s key features and how they can improve your lifestyle.

Bahia Plus

Larger than life, for the home chef

Some sinks are born to be different. From the moment the Bahia range was conceived, there was no doubt; it was one of the chosen ones. From the extra depth of its bowls to the special polishing that makes your kitchen a space filled with brightness and life, the Bahia sinks are one of a kind.

Classic Sinks
The classics are still in fashion.

Named Classic because this range retains its popularity with many. Classic in design but not in its performance features, the range incorporates all the latest technical innovations and trends: new models, greater bowl depth, a variety of trays, attractive configurations, more accessories, etc.

The secret of the classical is that it is ever-changing. Today’s novelties will be tomorrow’s classics.

<tbody>
<tr>
<td>Routine cleaning - All grades and finishes</td>
<td>Inox Cream applied with soft cloth or sponge. Rinse and wipe dry</td>
<td>If possible, use a warm to hand-hot solution. A 5% addition of ammonia is beneficial</td>
</tr>
<tr>
<td>Fingerprints - All finishes</td>
<td>Pre-treat marks with alcohol or an organic solvent. Follow immediately with routine cleaning</td>
<td>Minimise re-occurrence by applying a wax or silicone based household polish to the clean, dry surface</td>
</tr>
<tr>
<td>Stubborn stains and discolouration - All finishes except coloured Stainless Steel</td>
<td>Use a small amount of a creamy paste of mild household abrasive cleaner on a cloth made wet with detergent solution as per routine cleaning. Rinse and dry</td>
<td>Repeat several times rather than resorting to a single aggressive cleaning method. If some stubborn stains persist use a fine synthetic scourer pad instead of a cloth. Rub gently</td>
</tr>
<tr>
<td>Lime scale deposits from hard water</td>
<td>Prolonged soaking in a 25% vinegar solution or a 5% nitric acid solution. Periodically rub with a nylon bristled brush or fine synthetic scourer pad</td>
<td>Can usually be prevented by regular routine cleaning. Do not allow excessive build-up before treating</td>
</tr>
<tr>
<td>Grease, fats and oils - All finishes</td>
<td>Wipe off excess with soft cloth or paper towel. Use a water-borne or water-soluble de-greasing agent followed by Routine cleaning</td>
<td>Avoid any contact of ferrous (iron) containing materials with Stainless Steel. Dilute nitric acid (HNO₃), in strengths of up to 20%, is a “friendly” acid to Stainless Steel. It is the ONLY acid which may be used with no risk to Stainless Steel</td>
</tr>
<tr>
<td>Rust marks due to presence of or contact with ferrous materials</td>
<td>If heavy, swab with a sponge moistened with a dilute (10-15%) solution of nitric acid (HNO₃). Follow by Routine Cleaning</td>
<td>Slight heat tints may be removed by repeated application as for stubborn stain and discolouration</td>
</tr>
<tr>
<td>Dark oxide scale from welding or heat tints</td>
<td>Pickling and passivating plus thorough water rinsing as outlined previously. Follow by routine Cleaning</td>
<td>Deep scratches will be difficult to remove completely. Do not use metal scourers or wire wool unless they are made from Stainless Steel</td>
</tr>
<tr>
<td>Scratches on polished (lined) finishes</td>
<td>Slight scratches - Use a nylon pad loaded with an iron-free abrasive polishing compound. Follow the direction of the original polish lines. Follow with routine cleaning. Deep scratches - coarse abrasives should be used initially. Follow as for slight scratches</td>
<td>It must be appreciated that some of the above suggested procedures will alter the surface appearance of the treated area compared to that of the original surface finish. They should therefore be applied only with due consideration and care</td>
</tr>
</tbody>
</table>

Cleaning Procedure

Clean the Stainless Steel as often as experience dictates (i.e. when noticeably dull or dirty); and use the simplest cleaning procedure that will effectively “do the job”.

- Stainless Steel’s best friends are clean water or mild detergent solution, applied with a soft cloth or sponge, rinsed well and wiped dry.
- Routine simple, gentle and inexpensive cleaning will retain both the corrosion resistance and appearance of Stainless Steel through years of exposure and use. Occasionally a small amount of Inox Cream may be used on a soft cloth made wet with the detergent solution to remove stubborn dirt or slight incipient stains. Rub gently

- Employ regular routine cleaning rather than an occasional aggressive single cleaning.
- Only use propriety brands of cleaners that state “SUITABLE FOR STAINLESS STEEL”, such as Inox Cream.
- Always rinse and dry as the final step in a cleaning procedure

Cleaning Do’s

- Do not use coarse abrasive powders.
- Do not use metallic scourers or brushes with metal bristles.
- Do not use the so termed “silver cleaners”.
- Do not use acids (except nitric acid in specific instances).

Cleaning Don’ts

Product research has proved that certain household products which may be stored underneath a sink, can lead to damage to the sink’s base. Chlorine is the major culprit and can be found in: chlorine for swimming pools; household bleach; bathroom cleaning products like toilet cleaners, mildew treatments and tile cleaners; kitchen cleaning products – especially liquid cleaners; powders for dishwashers and laundry detergents. Preserve the life and beauty of your sink by storing these products away from the sink area in a well ventilated cupboard that is child-proof.

Storage of Products
